

Excel Assessment

Objective

The objective of this assessment is to create a report based on the learning outcomes of Excel.

Scenario

You work in a superstore as a Data Analyst and your manager has asked you to review the company's overall sales and profitability to pinpoint the main areas that need to be improved.

Task

Create a report on excel outlining your findings and suggest ways to increase sales where they aren't doing well.

You will have to present your report during one-to-one session
